SUMMARY

Final-year BE (IT) student with strong foundations in Machine Learning, Python, and data-driven application development. Hands-on experience in building, evaluating, and deploying ML models for real-world applications such as crop yield prediction. Proficient in data preprocessing, feature engineering, model evaluation, and API-based deployment using Flask. Highly motivated to apply AI/ML solutions in production environments and grow as an AI Engineer.

EDUCATION

A. P. Shah Institute of Technology — **Mumbai, India**
Bachelor of Engineering - Information Technology — *2022-2026*

- **CGPA: 7.44**

National Education Society's Jr. College of Arts, Science and Commerce — **Mumbai, India**
HSC (Computer Science) — *2020-2022*

- **Percentage: 75.50%**

TECHNICAL SKILLS

- **Programming:** Python, JavaScript, C++
- **Machine Learning:** Scikit-learn, Pandas, NumPy, Feature Engineering, Model Evaluation
- **AI Concepts:** Supervised Learning, Classification, Regression
- **Visualization:** Chart.js, Matplotlib, Seaborn
- **Frameworks:** Flask, ReactJS, Node.js, Express.js
- **Databases:** MongoDB, MySQL, Firebase
- **Tools:** Git, GitHub, Docker, Ubuntu
- **Visualization:** Chart.js, Matplotlib, Seaborn
- **Soft Skills:** Communication, Teamwork, Leadership
- **Certifications**: Zscaler Zero Trust Associate (ZTCA), Data Base Management System (NPTEL), AWS Data Engineering Virtual Internship (AICTE), Google AI-ML Virtual Internship (AICTE), Data Analysis using Python(IBM)
- **Others***:* PyGame, REST APIs

PROJECTS

- **CultivateConnect – ML Crop Forecast Dashboard *(AgriTech, Predictive Analytics)***

  Built a machine learning–based system to predict crop yield using historical agricultural and weather data. Performed data preprocessing, feature engineering, and model training using Scikit-learn to develop reliable predictive models. Achieved approximately 85% prediction accuracy after model evaluation and tuning. Deployed the trained ML model using Flask REST APIs to enable real-time predictions and integrated interactive dashboards to support data visualization and informed decision-making.
  Tech: Python, Scikit-learn, Node.js, MongoDB, Chart.js (Jan '24)
- **KrushiPal – Farmer-to-Consumer E-Commerce Platform *(Web Development, E-Commerce)***
  Built a React-based e-commerce site to connect farmers directly with consumers. Included features like user authentication, product filtering, and role-based dashboards. Optimized database queries and API endpoints to improve product search and filtering performance using MongoDB aggregation pipelines.
  Tech: ReactJS, Node.js, MongoDB, TailwindCSS (Oct '23)
- **Hangman Game – DBMS Themed *(EdTech, Game Development)***
  Designed an interactive Hangman game using PyGame to reinforce DBMS concepts for students in a fun and engaging way. Integrated a dynamic question bank with SQLite to store and retrieve DBMS-related terms, enhancing replayability and scalability.
  Tech: Python, PyGame (July '23)

MENTORING & LEADERSHIP EXPERIENCE

DevOps Club Mentor – A. P. Shah Institute of Technology

- Managed technical sessions on Docker, Git, and GitHub for over 100+ students per session.
- Handled content planning and post-session engagement to promote DevOps awareness across campus.
